## DIAMOND EYE - INFRADIAMOND

Infrared lights are designed for a demanding environment with IP65 outside cover. They are made of high-quality material and electronic parts which secure an extremely long life span and above-standard performance. Infrared lights are equipped with up-to-date technology Infra-diamond which shows extra light values.

### Properties Infrared light:

- Low power demand of 25 - 50W
- Beam length of 110 - 250 meters, 8°- 60°
- full smd technology
- INFRADIAMOND unique technology of a parabolic optical system
- life LEDs 50.000 hours
- IP65 outside cover
- 48V DC supply

### Properties Diamond EYE Power:

- feeding source
- Controlling logic for Diamond EYE
- POWER – regulation of light intensity
- DELAY – time delay of switching off
- TRESHOLD – light sensitivity of connection
- IP65 outside cover
- 230V AC supply
